

Semantic Resume Ranking Report

Role: Not specified

Required skills: data analysis, trend identification, summary statistics, insight generation, quantitative analysis, qualitative analysis, project management, scope definition, SQL, R, Python, C++

Rank	Candidate	Final	Conceptual Match	Required skills
1	Muskan Youtube	49.1	47.8	33.3
2	Payal Fresher	45.2	54.1	16.7
3	Khushi Bawistale	38.5	37.4	16.7
4	Muskan Bawistale	37.7	25.4	25.0
5	Punyaa Dixit	37.6	38.9	8.3
6	Computer Science & Engineering B.Tech	37.0	39.2	16.7
7	Priya Venkatesan	32.1	27.2	16.7
8	Anirudh R. Sharma	31.3	28.0	8.3
9	Rohan Mehta	31.1	27.0	8.3
10	Aaron Loeb	21.5	10.3	0.0

#1 Muskan Youtube — 49.1/100

Muskan Youtube has a moderate conceptual match, meets the experience requirement, and demonstrates data analysis, summary statistics, SQL, Python.

Strengths

- Meets the stated experience threshold
- Key skill matches: data analysis, summary statistics, SQL, Python

Improvement areas

- Missing or not evidenced: trend identification, insight generation, quantitative analysis, qualitative analysis, project management, scope definition
- Education requirement is not clearly evidenced

Missing requirements

trend identification, insight generation, quantitative analysis, qualitative analysis, project management, scope definition, R, C++

#2 Payal Fresher — 45.2/100

Payal Fresher has a moderate conceptual match, meets the experience requirement, and demonstrates SQL, Python.

Strengths

- Meets the stated experience threshold
- Key skill matches: SQL, Python

Improvement areas

- Missing or not evidenced: data analysis, trend identification, summary statistics, insight generation, quantitative analysis, qualitative analysis
- Education requirement is not clearly evidenced

Missing requirements

data analysis, trend identification, summary statistics, insight generation, quantitative analysis, qualitative analysis, project management, scope definition, R, C++

#3 Khushi Bawistale — 38.5/100

Khushi Bawistale has a limited conceptual match, meets the experience requirement, and demonstrates SQL, Python.

Strengths

- Meets the stated experience threshold
- Relevant tools: Large Language Models (LLMs)
- Key skill matches: SQL, Python

Improvement areas

- Missing or not evidenced: data analysis, trend identification, summary statistics, insight generation, quantitative analysis, qualitative analysis
- Projects do not strongly demonstrate the target responsibilities
- Education requirement is not clearly evidenced

Missing requirements

data analysis, trend identification, summary statistics, insight generation, quantitative analysis, qualitative analysis, project management, scope definition, R, C++

#4 Muskan Bawistale — 37.7/100

Muskan Bawistale has a limited conceptual match, meets the experience requirement, and demonstrates data analysis, SQL, Python.

Strengths

- Meets the stated experience threshold
- Relevant tools: Large Language Models (LLMs)
- Key skill matches: data analysis, SQL, Python

Improvement areas

- Missing or not evidenced: trend identification, summary statistics, insight generation, quantitative analysis, qualitative analysis, project management
- Projects do not strongly demonstrate the target responsibilities
- Education requirement is not clearly evidenced

Missing requirements

trend identification, summary statistics, insight generation, quantitative analysis, qualitative analysis, project management, scope definition, R, C++

#5 Punyaa Dixit — 37.6/100

Punyaa Dixit has a limited conceptual match, meets the experience requirement, and demonstrates Python.

Strengths

- Meets the stated experience threshold
- Key skill matches: Python

Improvement areas

- Missing or not evidenced: data analysis, trend identification, summary statistics, insight generation, quantitative analysis, qualitative analysis
- Projects do not strongly demonstrate the target responsibilities
- Education requirement is not clearly evidenced

Missing requirements

data analysis, trend identification, summary statistics, insight generation, quantitative analysis, qualitative analysis, project management, scope definition, SQL, R, C++

#6 Computer Science & Engineering B.Tech — 37.0/100

Computer Science & Engineering B.Tech has a limited conceptual match, meets the experience requirement, and demonstrates Python, C++.

Strengths

- Meets the stated experience threshold
- Key skill matches: Python, C++

Improvement areas

- Missing or not evidenced: data analysis, trend identification, summary statistics, insight generation, quantitative analysis, qualitative analysis
- Projects do not strongly demonstrate the target responsibilities

- Education requirement is not clearly evidenced

Missing requirements

data analysis, trend identification, summary statistics, insight generation, quantitative analysis, qualitative analysis, project management, scope definition, SQL, R

#7 Priya Venkatesan — 32.1/100

Priya Venkatesan has a limited conceptual match, meets the experience requirement, and demonstrates SQL, Python.

Strengths

- Meets the stated experience threshold
- Key skill matches: SQL, Python

Improvement areas

- Missing or not evidenced: data analysis, trend identification, summary statistics, insight generation, quantitative analysis, qualitative analysis
- Projects do not strongly demonstrate the target responsibilities
- Education requirement is not clearly evidenced

Missing requirements

data analysis, trend identification, summary statistics, insight generation, quantitative analysis, qualitative analysis, project management, scope definition, R, C++

#8 Anirudh R. Sharma — 31.3/100

Anirudh R. Sharma has a limited conceptual match, meets the experience requirement, and demonstrates R.

Strengths

- Meets the stated experience threshold
- Key skill matches: R

Improvement areas

- Missing or not evidenced: data analysis, trend identification, summary statistics, insight generation, quantitative analysis, qualitative analysis
- Projects do not strongly demonstrate the target responsibilities
- Education requirement is not clearly evidenced

Missing requirements

data analysis, trend identification, summary statistics, insight generation, quantitative analysis, qualitative analysis, project management, scope definition, SQL, Python, C++

#9 Rohan Mehta — 31.1/100

Rohan Mehta has a limited conceptual match, meets the experience requirement, and demonstrates SQL.

Strengths

- Meets the stated experience threshold
- Key skill matches: SQL

Improvement areas

- Missing or not evidenced: data analysis, trend identification, summary statistics, insight generation, quantitative analysis, qualitative analysis
- Projects do not strongly demonstrate the target responsibilities
- Education requirement is not clearly evidenced

Missing requirements

data analysis, trend identification, summary statistics, insight generation, quantitative analysis, qualitative analysis, project management, scope definition, R, Python, C++

#10 Aaron Loeb — 21.5/100

Aaron Loeb has a limited conceptual match, meets the experience requirement, and demonstrates few explicit required skills.

Strengths

- Meets the stated experience threshold

Improvement areas

- Missing or not evidenced: data analysis, trend identification, summary statistics, insight generation, quantitative analysis, qualitative analysis
- Projects do not strongly demonstrate the target responsibilities
- Education requirement is not clearly evidenced

Missing requirements

data analysis, trend identification, summary statistics, insight generation, quantitative analysis, qualitative analysis, project management, scope definition, SQL, R, Python, C++
